EP Kamat Group · BSE SME listed · Bicholim, Goa

CASE CONSILIUM 2026 · ROUND 2

How EPBL wins the private wastewater market

Sell to the three buyers who are forced to treat their wastewater, start close to home, and let service income compound. That takes EPBL from ₹11.7 crore today to about ₹25 crore by FY29.

TEAM WOOKIES

 Raunak Jain

 Dhruv Mundra

 Khushi Jha

 Sambhav Khandelwal

₹270 cr/yr

of private demand across 3 states

3 buyers

hotels, developers, hospitals

₹25.4 cr

revenue we target by FY29

Executive Summary

₹25.4 cr

FY29 revenue in our base case (low ₹22.1, high ₹29.3)
2.2x the FY26 base of ₹11.7 cr

₹21 cr

of new private-market revenue added over FY27-29
₹15-28 cr depending on scenario

7.2%

of the ₹165 cr/yr serviceable market held by FY29
starting from roughly zero today

₹2.4 cr/yr

comes back yearly from AMC, O&M and monitoring
about 10% of FY29 sales

Our plan in five steps

- 1 Sell to the buyers who have no choice: hotels, Tier-2 developers and private hospitals
- 2 Start in Goa and towns within a day's drive; enter new cities only after old ones hit their targets
- 3 Open doors with a ₹25k site audit, then sell standard 10/25/50/100 KLD packages billed by milestone
- 4 Put AMC on at least 60% of installs, with IoT monitoring so clients clear consent renewals
- 5 Grow from the installed base: fix broken STPs, monitor them, then recycle their water (with IISc)

Who we go after first (weighted score)

Coastal & leisure hoteliers

20-150 keys · ₹18-45 L + AMC

Buys when PCB consent or water bills bite

4.50

Tier-2 residential developers

100-400 units · ₹35 L-1.2 cr

Needs a working STP to get the occupancy certificate

3.80

Private hospitals & clinics

30-150 beds · ₹12-35 L + AMC

BMW Rules make treatment compulsory above 10 beds

3.75

Where, and in what order

P1 · FY27

Goa plus Konkan, Kolhapur, Belagavi (within 250 km)

P2 · FY28

Hubballi-Dharwad, Mangaluru, Mysuru, with 2 hubs

P3 · FY29

Deeper Tier-3 towns through 25 trained partners

The risk that worries us most

Developers paying late and locking up working capital. Our guardrails: 30-40-25-5 milestone billing with an advance, credit checks with PDCs, developers capped at 25% of the order book, and no new city if DSO crosses 75 days.

 **BY FY29** 66 treatment projects and 400-plus bio-digesters, 14 clusters via 2 hubs and 25 partners, about ₹6 cr of self-funded spend

Figures from the p.4 market model and p.5 roadmap; FY26 base per BGCC problem statement. All FY27-29 figures are estimates. 02

Eight buyer groups scored: **three worth chasing**

How we scored them (10 factors)

WEIGHTS demand 15 · urgency 15 · fit 10 · ticket 10 · access to decision maker 10 · payment 10 · repeat/AMC 10 · service reach 10 · rivalry 5 · cycle 5 (scored 1 to 5, detail on p.9)

The three buyers, up close

Coastal & leisure hotelier

4.50

WHY NOW Consent renewal due, property expanding, or tanker bills hurting

WHO SIGNS The owner; GM and MEP consultant weigh in

BUDGET ₹18-45 L turnkey plus AMC of ₹0.6-1.5 L a year

TIMELINE 2 to 4 months

PROOF A hotel they can visit, NABL lab reports, DRDO pedigree

WAY IN ₹25k audit, adjusted against the order; install inside 4 weeks

REPEAT Sister properties, reuse add-on, consumables

Tier-2 residential developer

3.80

WHY NOW EC terms and the occupancy certificate demand a live STP

WHO SIGNS Promoter; MEP consultant and PMC write the spec

BUDGET ₹35 L to 1.2 cr design-build, billed by milestone

TIMELINE 6 to 9 months, moving with construction

PROOF 200-plus housing installs, the ONGC 100 KLD job, bank guarantee

WAY IN Free STP sizing at EC stage so we get written into the spec

REPEAT Their next project, plus society O&M after handover

Private hospital & clinic

3.75

WHY NOW BMW Rules apply above 10 beds; NABH and consent add pressure

WHO SIGNS Owner-doctor or trustee; the administrator runs the process

BUDGET ₹12-35 L compact skid plus AMC of ₹0.8-2 L a year

TIMELINE 3 to 6 months

PROOF Compliance file, and proof we can install without shutting wards

WAY IN Liquid-waste audit plus help dealing with the PCB

REPEAT Sister facilities, disinfection upgrades, long AMC stays

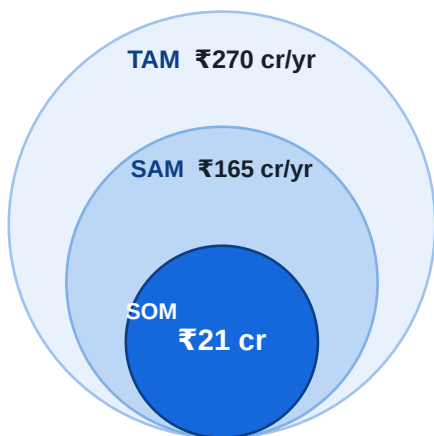

OUR CALL Put 80% of new-business time on these three. Homeowners keep buying through dealers; industrial ETPs only when they come to us.

A ₹270 cr a year market: we can take ₹21 cr of it

Sized bottom-up, not from reports

- **TAM** all private-pay Tier 2/3 demand in the 3 states (₹239 cr STP/ETP, ₹32 cr bio)
- **SAM** what our corridor and skills can serve, ₹5 L-2.5 cr jobs
- **SOM** new revenue we add over FY27-29 (₹15-28 cr), 7.2% of SAM by FY29

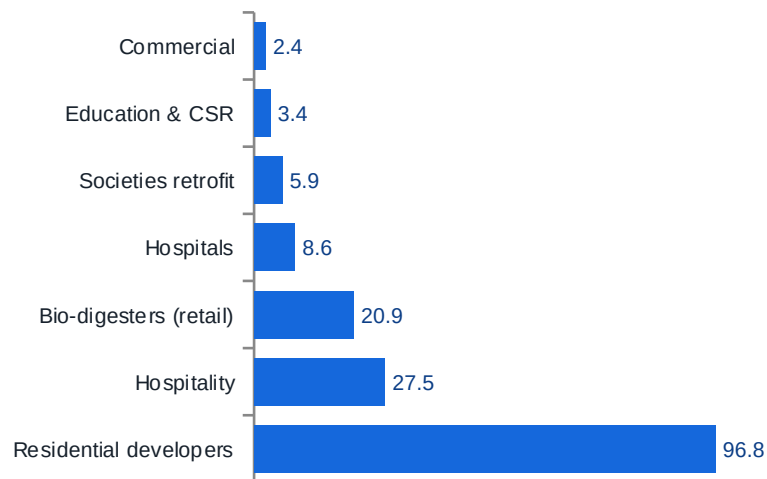

📍 MH 59%

📍 KA 28%

📍 Goa 13%

Serviceable demand by segment, ₹cr/yr

Developers are the biggest pool but pay slowly, so **we lean on hotels and hospitals and cap developers at 25% of the book**. Formula: units x share lacking treatment x fit x conversion x ticket (p.9).

Scenarios & feasibility checks

FY29, ₹cr	Cons.	Base	Upside
Total revenue	22.1	25.4	29.3
Cum. new revenue FY27-29	15.0	20.7	27.6
Cum. total revenue FY27-29	53.7	59.4	66.3

WHAT MOVES THE NUMBER hotel conversion between 6 and 10% a year (₹9 cr swing); developer STP-trigger share between 15 and 25% (₹35 cr); proposal win rate between 15 and 25%.

- ✓ FY29 needs 34 installs a year; 5 crews (3 ours, 2 partner) can do it
- ✓ At 75 receivable days, ₹5.2 cr is locked up, vs net worth above ₹12 cr
- ✓ The ₹6.2 cr of investment over 3 years comes from internal accruals

OUR PITCH The compliance partner next door: certified technology, FRP made in Goa, service within a day or two. We sell on lifetime cost, not the cheapest quote.

COMPETITOR MATRIX	EPBL	Daiki Axis	Ion Exchange	Thermax	SUSBIO	Banka BioLoo	NCR online
Technology	DRDO bio-digester + MBBR/SBR/MBR + ozone FRP	Johkasou FRP capsule, 1-50 KLD	INDION packaged, SBR, MBR	FabX MBBR, BioCask, custom ETP	ECOTREAT anaerobic + MBBR FRP	DRDO-inoculum bio-toilets, STP, FSM	MBBR / MBR / SBR fabrication
Sweet spot	5-100 KLD private compliance buyers	Villas, hotels, institutions	SME up to municipal, all scales	Industrial; above 1 MLD EPC	Hotels; ₹35k/KLD, 3-5 day install	Railways, institutions (₹56.5 cr)	Commercial & industrial
Presence & local O&M	Goa OEM, 200+ installs, 24-48h corridor crews	Dealers; ₹200 cr Tumakuru plant; dealer O&M	Partner network; small jobs routed out	Pan-India; distributor-sold small KLD	MH & west; service base growing	Hyderabad; rail O&M annuity focus	SEO claims; remote response only
Gap EPBL can use	Ours to defend, with certification and service	Premium import; thin turnkey civil work	Small jobs get no direct engineering service	10-50 KLD is not their focus	Toughest rival; beat them on Goa/KA service	Weak hospitality presence	Local 24-48h service wins

A 36-month rollout that earns each next step

1 Goa and the Konkan belt FY27

- WHERE** Goa (all), Sindhudurg-Ratnagiri, Kolhapur, Belagavi (≤250 km of Bicholim)
- WHO** Hoteliers first; hospitals; selective developers
- SELL** 10/25/50 KLD FRP packages; ₹25k audit entry; bio-digester retail; STP Rescue
- ROUTE** Founder-led key accounts plus 2 salespeople; 15 MEP consultants; TTAG, GCCI, CREDAI Kolhapur; 10 dealers
- INVEST** ₹1.4 cr: hires, demo skids, service van, CRM, NABL tie-up
- TARGET** ₹3.0-3.5 cr new orders · 10 installs · AMC ≥50%

2 Into Karnataka FY28

- WHERE** + Hubballi-Dharwad, Mangaluru, Mysuru, Sangli probe; Belagavi hub + Mangaluru spoke
- WHO** Developers scaled up; hospitals; education & CSR
- SELL** +100 KLD series, hospital ETP skid, SmartSTP monitoring, 3-yr O&M handover
- ROUTE** 25 consultants; 6 EPC franchisees; AHPI/IMA chapters; CSR implementation partners
- INVEST** ₹2.2 cr: 2 hubs, 4 hires, inventory, monitoring stock
- TARGET** ₹6.4 cr new revenue · channel ≥40% · uptime ≥95%

3 Tier-3 through partners FY29

- WHERE** Davanagere, Shivamogga, Udupi, Hassan, Solapur; Nashik & Sambhajinagar partner-led
- WHO** All three personas + societies retrofit at scale
- SELL** Full catalogue + AquaLoop reuse + O&M takeovers; WaaS pilot
- ROUTE** 25 certified dealer-installers; association programmes; direct for ₹50 L+ deals
- INVEST** ₹2.6 cr: dealer academy, monitoring fleet, working capital
- TARGET** ₹11.9 cr new revenue · recurring ~10% · 34 installs/yr

GATE 1 → 2 ≥10 lab-verified references · AMC ≥50% · DSO ≤75 · pipeline ≥3× next-year target

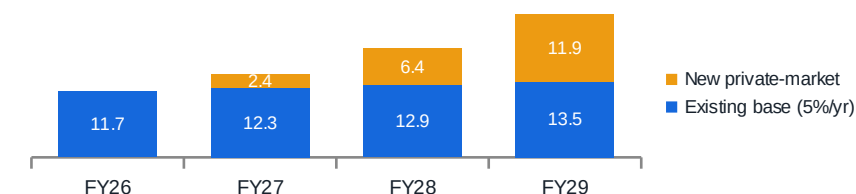

GATE 2 → 3 Channel ≥40% of pipeline · install ≤45 days · uptime ≥95% · repeat ≥20% · GM ≥30%

Acquisition funnel & capacity (FY27 → FY29)

Cycle: hotels 2-4 mo · hospitals 3-6 mo · developers 6-9 mo | Crews: 2 of our own in FY27, growing to 3 own + 2 partner by FY29 (~8 installs per crew a year) | KPIs: pipeline cover, proposal-to-win %, DSO, install cycle, AMC attach, uptime, repeat share

Revenue build, ₹cr (base)

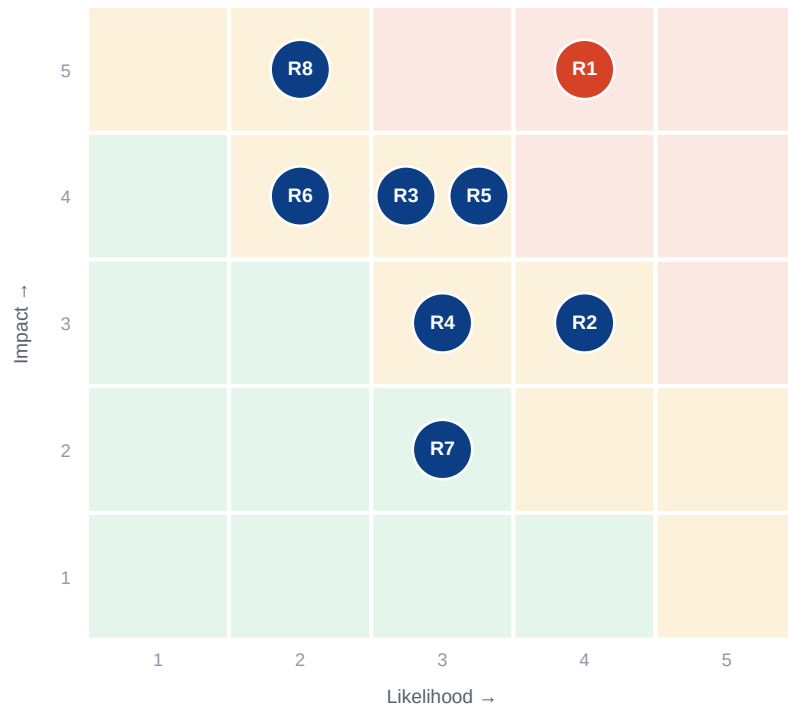

THE RULE We open a new city only after the last one passes its gate. Service quality and cash discipline grow first, geography second.

What can go wrong, and what we would do about it

Likelihood × impact heatmap

R1 Developer receivables (Fin) · **R2** Price war (Comp) · **R3** Commissioning & inoculum (Ops) · **R4** Partner conflict (Distr.) · **R5** Service outrun (Ops) · **R6** Norm tightening (Reg.) · **R7** Cycle stalls cash (Fin) · **R8** Marquee failure (Reput.). Red = red-zone (L+I ≥ 8)

The six risks that matter, and our answers

Risk (cat.)	Root cause & impact	Early warning	Preventive control	Contingency	Owner
R1 Developer receivables (Financial)	Milestone slippage, RERA escrow; ₹2-3 cr locked, growth stalls	DSO >75; billing-collection gap >2 mo	30-40-25-5 milestones + advance; credit checks + PDCs; 25% exposure cap	Stop-work clause; invoice discounting	CFO
R2 Price-led rivalry (Competitive)	SUSBIO ₹35k/KLD; Daiki KA plant; NCR bidders erode margin	Win rate <25%; discount >8%	Lifecycle-cost selling; compliance + AMC bundle; 28% GM walk-away floor	Value-engineered Lite SKU	Sales head
R3 Commissioning & inoculum variation (Operational)	Site variability; biology stabilises 4-8 weeks	>2 sites off-norm at day-30	Factory acceptance test; inoculum batch QC; 30/60/90-day NABL tests	Rapid-response; ozone-assist retrofit	Tech head
R4 Partner conflict (Distribution)	Territory overlap, poaching; channel stalls	Partner pipeline <30% plan; duplicate leads	≤2 partners/territory; registered-lead lock; installer academy; tiers	Territory reassignment; direct cover	Channel mgr
R5 Expansion outruns service (Operational)	Install base grows faster than technicians; SLA breach	Response >48h; uptime <95%	KPI gates; hub per ~150 km; 1 technician : 25 AMC sites	Freeze clusters; contract service partners	COO
R6 Norms tighten (Regulatory, our added category)	NGT / CPCB revisions strand designs	Draft notifications; consent queries	Design margin to stricter norms; IISc tertiary pipeline	Paid retrofit-upgrade programme	MD + Tech

The two risks we watch rather than fix upfront

R7 Long cycles stall cash (Fin): we track pipeline cover weekly (at least 3x the next quarter's target); the audit entry offer keeps hotel cycles down to 2-4 months.

R8 A big-name site fails (Reputation): IoT uptime alerts on every AMC site, a 48-hour response promise, a preventive maintenance calendar, and a yearly NABL effluent audit at reference sites.

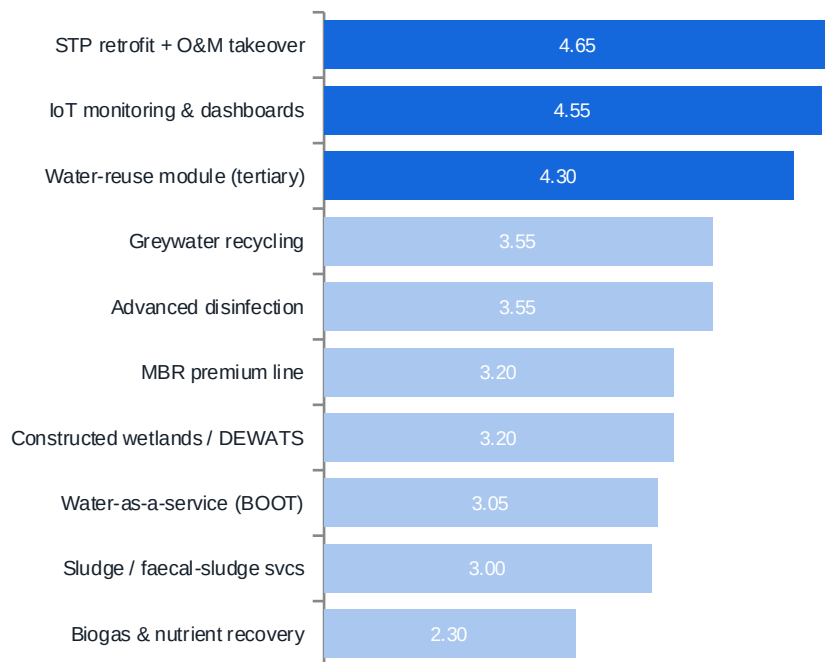

IN SHORT

Milestone billing, exposure caps and gated expansion keep the plan self-funding. R7 and R8 sit on watch metrics, not in the red zone.

Three add-ons worth building, in a set order

Weighted adjacency scores (7 criteria, 100 pts)

CRITERIA (WEIGHTS) demand 20 · synergy & feasibility 20 · capital 15 (inverse) · margin 15 · complexity 10 (inverse) · time-to-market 10 · recurring 10. Scored 1 to 5; full matrix on p.9

STP Rescue: retrofit + O&M takeover

NOW (M0-3) · BUILD IN-HOUSE

WHY CPCB found a third of installed capacity idle or off-norm, so demand is certain and capex is zero

PILOT 10 audits at Goa hotels

PRICE ₹3-15 L per retrofit plus ₹0.5-3 L a year for O&M (about 35% margin)

METRIC 25 retrofits and 40 O&M contracts by FY29; this also seeds the AMC fleet

SmartSTP: IoT monitoring & compliance

M6 · WHITE-LABEL + OWN DASHBOARD

WHY Consent renewals increasingly ask for data, and it makes every EPBL AMC harder to replace

PILOT 20 AMC sites in Goa

PRICE ₹10-15k to install plus ₹3-5k a month per site; ₹50-70 L to set up

METRIC 150 connected sites by FY29, with churn under 10%

AquaLoop: treated-water reuse module

M9-12 · DEVELOP WITH IISc

WHY Hotels pay tanker rates for water that CGWA already tells them to recycle; builds on the oxy-STP line and the IISc MoU

PILOT 2 Goa resorts and 1 Kolhapur society

PRICE ₹6-18 L add-on skid (UF, carbon, UV/ozone); ₹1-1.5 cr to develop

METRIC On 25% of new STP orders by FY29

Sequencing

M0-3 STP Rescue

M6 SmartSTP

M9-12 AquaLoop

FY29 WaaS pilot

BOTTOM LINE

The add-ons sell into plants we already service and lift recurring revenue to about 10% of sales by FY29, with no new manufacturing.

METHODOLOGY

Sizing: bottom-up per segment per state, as units x share lacking treatment x fit x conversion x ticket. No top-down report allocation.

Scenarios: conversion, trigger-share, win-rate flexed; conservative = lowest defensible; upside = capacity-bound.

Scoring: segmentation 10 factors / portfolio 7 criteria; weights on slides 3 & 7; evidence-based 1-5.

Rounding: ₹cr to 1 decimal; estimates labelled; no false precision.
