

From ATP peaks to retained paying subscribers

Converting irregular ATP Tour interest into incremental, retained subscription growth for FanCode in India

Wookies

Raunak Jain · Khushi Jha · Dhruv Mundra · Sambhav Khandelwal

Buy intent, sell the season, prove the lift: ₹4 lakh now, ₹6 lakh on evidence

Executive summary

1 · Eligible audience

Acquire never-paid tennis intent, reactivate lapsed 2025 buyers, cross-sell F1, MotoGP, LaLiga payers; defer the broad base.

2 · Relevant paid occasion

Sessions ₹29-₹39 with morning replay, tournaments ₹79-₹99, rest of season ₹199; each rung credited to the next.

3 · Repeat value

Race to Turin, a 30-day upgrade credit, a season-end bridge and a ₹349 loyalty price for 2027.

₹206 / ₹317

Attributed / incremental CAC per new payer, search + retargeting row only, base case

₹550 to ₹1,027

Cost per incremental new payer: Stage 1 (₹4 lakh, no engineering) to the full ₹14 lakh incl. implementation

-₹1.0 lakh / -₹8.8 lakh

24-month incremental contribution net of spend: Stage 1 / full programme incl. ₹4 lakh engineering

Decision: commit Stage 1 (₹4 lakh: owned channels, reactivation, one paid search cell, 10% holdout). Release Stage 2 (₹6 lakh) and ₹4 lakh engineering only if day-45 incremental CAC $\leq$ ₹276 and upgrade share $\geq$ 32%. The base case misses this gate: the pilot buys measurement, not a return.

Intent and payment state decide the action: **acquire, reactivate, cross-sell or retain**

Priority. 1 acquire, 2 reactivate, 3 cross-sell; ATP core is a retention audience.

Equal markers: no audience sizes are verified (CF1). Signals use first-party consented data only.

Ordinary weeks are retention weeks: about 90% of their viewers are already fans (CF4).

Sources: CF1-CF4, CF17 (case brief); S3 ATP calendar; S15 LaLiga on FanCode. Adjacent-sport rows are existing-payer cross-sell and never enter the new-payer count.

Owned channels build the occasion from T-7 days; paid conversion fires at T-48 hours

India-friendly occasion = live; overnight occasion = next-morning replay (times typical, illustrative)

Persona	Trigger	Offer → next paid step	Sample message (≤ 15 words)
ATP core (paying)	After each final	Upgrade credit → ₹199	
Marquee followers, never paid	T-48 h, Shanghai	₹89 pass; credit within 30 days	"Shanghai starts Wednesday, 17:00 IST. ₹89 covers all 12 days and counts toward your season."
F1 pass holders	Tue-Fri, never race Sunday	₹39 night session	
MotoGP pass holders	Asian-swing mornings	₹39 day session	
LaLiga late-night viewers	Fri / Sat, Paris and Turin weeks	₹39 evening session + 07:00 replay	"Kick-off at 1:30 AM? So is Paris. ₹39: watch live, or spoiler-free at 7 AM."

One public ladder, session to tournament to rest of season: each rung is credited to the next

Timing examples. Shanghai night, 17:00 IST: ₹39 session. Vienna evening, 00:00 IST: ₹29 session with the 07:00 replay.

Folded or rejected. Replay rental folded into the session pass; player bundle rejected (participation cannot be guaranteed).

Caveat. Monthly Pass ₹179 covers 'all applicable' tours (S11): confirm inclusions before promising F1 or LaLiga.

Product	Upfront price · period	ATP
FanCode tournament	₹79-₹99 · 1 event	Yes
FanCode rest of season	₹199 · 7 weeks	Yes
JioHotstar Mobile (S5)	₹79 · month	No
SonyLIV Mobile (S6)	₹699 · year	No

Ladder totals equal direct prices (₹29 + ₹50 = ₹79; ₹89 + ₹110 = ₹199), so no path undercuts a direct purchase.

Rest-of-season entrants clear the acquisition hurdle; tournament entrants do not without upgrades

Break-even upgrade share, tournament entrants, 24 months: 32% at ₹206 attributed, 81% at ₹317 incremental (not achievable); base assumption 20%. $u^* = (CAC - C_{entry}) \div (C_{upgrade} - C_{entry})$.

24-month net, ₹ lakh	Down	Base	Up
Stage 1: ₹4 lakh, no engineering	-₹2.9L	-₹1.0L	+₹2.4L
Full: ₹10 lakh + ₹4 lakh engineering	-₹12.1L	-₹8.8L	-₹3.0L
Full, attributed	-₹5.3L	-₹0.8L	+₹5.4L

Incremental basis, net of cannibalisation, cash at purchase; the fixed ATP rights fee is excluded, so this is not profit.

Base case: the full programme loses ₹8.8 lakh over the rights horizon; Stage 1 nearly breaks even (-₹1.0 lakh).

Retention runs on the next occasion: **first purchase, next viewing, next paid decision, renewal**

Solution 5 of 8

Portfolio branches. F1, MotoGP and LaLiga: an engagement nudge when already entitled; a paid purchase when not. Never new payers.

Controls. Entitlement checked before every send; caps 3 / 2 / 1 pushes a week (new payers / others / replay); refunds suppress offers 30 days.

Behavioural return, paid access and renewal are three different measures, reported separately (Solution 7).

₹10 lakh in two stages: ₹4 lakh now, ₹6 lakh only if the gate is met

Solution 6 of 8

Allocation by row, ₹ lakh (total ₹10.0 lakh = 100%)

CAC per new payer, ₹ (rows with a new-payer denominator)

Not directly attributed: C5, C6, C7, C8 (₹4.0 lakh) sit in programme cost with no CAC. Performance share: 65-70% today → 47% (C1 + C2 + C4).

Stage 1 (₹4 lakh): 1,236 attributed / 727 incremental new payers, 630 reactivated; ₹550 per incremental new payer.

Full programme: ₹439 attributed, ₹733 incremental, ₹1,027 with ₹4 lakh implementation, per new payer.

Gate G2 (day 45): release Stage 2 paid rows only if C2 incremental CAC ≤ ₹276 and upgrade share ≥ 32%. The base case fails this gate.

A persistent 10% holdout turns attributed sales into measured incremental payers

Detecting a 50% lift on a 0.36% purchase rate with a 90/10 split needs about 128,000 eligible users (12,800 held out). Cohorts mature at day 90: 22 Dec-16 Jan for October buyers.

Measure	Definition and window	Threshold
North star: incremental D90 retained payers ÷ incremental new payers	Paid entitlement on day 90 and ≥ 1 qualified view (≥ 20 min, any FanCode content) in days 61-90; fixed window; treatment minus control	≥ 30%
Incremental CAC, search + retargeting row	Row spend ÷ incremental new payers	≤ ₹276
Upgrade share within 30 days	Rest-of-season purchases ÷ tournament entrants whose window closed	≥ 32% (break-even at ₹206)
Next-event return	Qualified view in the next tournament ÷ new payers whose next tournament ended	≥ 45%
2027 ATP renewal (event-based)	Season purchases by 15 Feb ÷ eligible 2026 rest-of-season holders	≥ 50%

Release ₹4 lakh now; ₹6 lakh and engineering wait for measured lift at day 45

Solution 8 of 8

Risks. Cannibalisation → one credit per account, loyalty price for prior holders. Weak lift → stop rules; owned rows continue. Withdrawals → event-defined SKUs, automatic credits.

Decision. ₹14 lakh maximum exposure; ₹4 lakh committed now. Base 24-month incremental net: Stage 1 –₹1.0 lakh, full –₹8.8 lakh: Stage 2 is released only if results beat the base case.

Definitions

New payer. First-ever FanCode payment is an ATP pass. Reactivated = a lapsed 2025 buyer returning. Existing-payer ATP purchase = a current F1, MotoGP, LaLiga or Monthly payer buying ATP.

CAC. Attributed = row spend ÷ attributed new payers. Incremental = spend ÷ (attributed × validated share from the holdout). Programme cost per payer uses the whole budget, with or without implementation.

Contribution. Price ÷ 1.18 (GST assumed included) – 4% of gross (gateway, support) – ₹2 per streaming hour; cash basis; the fixed ATP rights fee is excluded.

Horizons. 90 days, 12 and 24 months from a 7 Oct 2026 purchase; 24 months sits inside the rights term to 2028 (CF18).

Assumptions and limits: CRM pools (150k / 120k / 40k / 60k), CPC, CPM, CVR, class mixes, pathway shares, renewals and session start times are model assumptions. Unverified: the case PDF (quoted via the master prompt register), Tennis TV live availability in India, the 2027 season tariff, Monthly Pass tour inclusions. ATP = Association of Tennis Professionals; CRM = customer relationship management; D90 = day 90 after first purchase; IST = India Standard Time.
