

EP Biocomposites Limited

Concentrate to conquer: three private buyers, one west-coast corridor, service-led growth from ₹11.7 crore to ₹25 crore by FY29

TEAM WOOKIES

Raunak Jain Dhruv Mundra Khushi Jha Sambhav Khandelwal

EXECUTIVE SUMMARY

Win three compliance-driven buyers in a serviceable corridor, then let service quality, not geography, set the pace

PRIORITY PERSONAS

Coastal and leisure hoteliers (20-150 keys), Tier-2 residential developers (100-400 units), and private hospitals (30-150 beds). They score 4.50, 3.80 and 3.75 on our 10-factor weighted framework; all three buy under a compliance trigger, not discretionary demand.

MARKET OPPORTUNITY

Private-pay decentralised demand in the three states is ~₹270 cr/yr (bottom-up); ₹165 cr/yr is serviceable from EPBL's corridor and capability. Realistic 3-year capture: ₹15-28 cr of new revenue (base ₹21 cr), on top of the existing ₹11.7 cr base.

WHERE TO START

Phase 1 is Goa plus the 250 km corridor: Sindhudurg-Ratnagiri, Kolhapur, Belagavi, where EPBL is the only in-state OEM with references. Karnataka's Tier-2 anchors (Hubballi-Dharwad, Mangaluru, Mysuru) follow in Year 2, Tier-3 depth via partners in Year 3.

COMMERCIAL MODEL

Audit-led direct sales plus MEP-consultant and CREDAI/hotel-association channels; standardised 10/25/50/100 KLD FRP packages; 30-40-25-5 milestone billing; AMC attached to ≥60% of new installs.

END OF YEAR 3

₹25.4 cr revenue (2.2x FY26), ~66 new treatment projects and 400+ bio-digesters delivered, ₹2.4 cr/yr recurring service revenue, receivable days ≤75, all funded from internal accruals and IPO working capital (~₹6 cr investment over 3 years).

ADJACENT OFFERINGS

1) STP Rescue: retrofit and O&M takeover of failing third-party plants (launch now, zero capex). 2) SmartSTP: IoT compliance monitoring on the AMC fleet (month 6). 3) AquaLoop: water-reuse polishing module built on the IISc MoU (months 9-12).

BIGGEST RISK

Developer receivables stretching working capital. Control: milestone billing with advances, credit checks and PDCs, developer exposure capped at 25% of the order book, and KPI gates that stop expansion when DSO exceeds 75 days.

EPBL BY FY29 (BASE CASE)

₹25.4 cr

revenue, 2.2x the FY26 base of ₹11.7 cr

₹21 cr

cumulative new private-market revenue FY27-29 (range ₹15-28 cr)

7.2%

share of serviceable annual demand by FY29, from ~0% today

₹2.4 cr/yr

recurring AMC, O&M and monitoring revenue (~10% of sales)

14 clusters

across 3 states, via 2 service hubs and 25 certified partners

DELIVERABLE 1 | CUSTOMER SEGMENTATION AND TARGETING

Three of eight private buyer segments justify focused pursuit: hoteliers, Tier-2 developers and private hospitals

Segment attractiveness, 10-factor weighted score Priority persona playbook

Ease of capture → (access to decision maker, cycle, payment reliability, serviceability, rivalry)

Bubble area = average ticket size (₹0.6 L to ₹48 L). Amber = priority personas.

Weights: demand 15 · compliance urgency 15 · product fit 10 · ticket 10 · decision-maker access 10 · payment reliability 10 · repeat & AMC 10 · serviceability 10 · rivalry 5 · cycle 5. Scores 1-5, evidence in backup (p.9).

	1 Coastal & leisure hotelier	2 Tier-2 residential developer	3 Private hospital / clinic
Who & trigger	20-150 key hotels, resorts, hostels in Goa, Konkan, hill towns. Trigger: GSPCB/MPCB consent renewal or notice, expansion, tanker-water cost.	100-400 unit projects in Kolhapur, Belagavi, Hubballi, Mysuru. Trigger: EC condition (≥20,000 sqm) and occupancy certificate need a working STP.	30-150 bed private hospitals. Trigger: BMW Rules 2016 mandate effluent treatment for >10-bed facilities; NABH audits; SPCB consent.
Decision maker	Owner-promoter decides; GM, chief engineer and PCB consultant influence.	Promoter/director decides; MEP consultant, PMC and liaison architect specify.	Owner-doctor or trustee decides; hospital administrator and biomedical engineer influence.
How they shortlist	Peer referrals, MEP consultants, TTAG/GCCI association contacts, visible local installs.	Consultant empanelment, CREDAI chapter events, past-project references.	Hospital consultants, IMA/AHPI chapters, PCB-liaison advisors.
Price they bear	₹18-45 L turnkey (10-50 KLD) + AMC ₹0.6-1.5 L/yr.	₹35 L-1.2 cr design-build (25-150 KLD), milestone billed.	₹12-35 L compact ETP/STP skid (5-30 KLD) + AMC ₹0.8-2 L/yr.
Cycle & proof	2-4 months. Needs reference visits, effluent lab reports, uptime SLA, DRDO-certified pedigree.	6-9 months, tracks construction. Needs 200+ housing installs, ONGC 100-KLD MBR reference, bank guarantee.	3-6 months. Needs compliance document pack, disinfection performance, live-site install method.
Entry offer → onboarding	₹25k water & compliance audit credited to order → design in 7 days → fixed-price modular install ≤4 weeks → AMC with quarterly lab reports.	Free STP sizing + compliance plan at EC stage → spec-in via consultant → staged install → society handover kit with 3-yr O&M.	BMW-compliance liquid-waste audit → PCB liaison support → phased install in live hospital → compliance dashboard reporting.
Repeat & referral	Sister properties, reuse-module upsell, consumables; dense hotel clusters refer.	Next projects, retrofit of older stock, society O&M annuity after handover.	Sister facilities, disinfection upgrades, long AMC tenure; doctor networks refer.

DECISION Put 80% of new-business effort on these three personas. Homeowners stay a dealer-led run-rate business; industrial ETPs are taken opportunistically, not pursued.

A ~₹270 cr/yr private market; EPBL can credibly win ₹15-28 cr of new revenue over three years

Bottom-up opportunity (annual)

TAM ₹270 cr/yr

All private-pay decentralised demand, Tier 2/3 of Goa + MH + KA (₹239 cr STP/ETP + ₹32 cr bio-digester)

SAM ₹165 cr/yr

Within EPBL's 3-phase corridor & capability; ₹5 L-2.5 cr projects; excludes complex industrial chemistry

SOM ₹21 cr

3-yr cumulative NEW revenue FY27-29 (range ₹15-28 cr); FY29 run-rate = 7.2% of SAM

SAM by segment, ₹cr/yr

Scenarios & key sensitivities

FY29, ₹cr	Cons.	Base	Upside
Total revenue	22.1	25.4	29.3
Cum. new rev. FY27-29	15.0	20.7	27.6
Cum. total rev. FY27-29	53.7	59.4	66.3

Swing factors: hotel conversion 6→10%/yr (±₹9 cr TAM); developer STP-trigger share 15→25% (±₹35 cr); win-rate 15→25%. Checks: FY29 needs 34 installs/yr (5 crews, feasible); receivables at 75 DSO = ₹5.2 cr vs net worth >₹12 cr.

By state (TAM): MH 59% · KA 28% · Goa 13%; Goa is smallest but highest win-rate (home market). **Formula:** units x %lacking x fit x conversion x ticket, per segment per state (p.9).

Competitor & technology landscape (researched)

Developers dominate value but pay slowly: **SOM tilts to hotels & hospitals first**; developer exposure capped at 25% of order book.

Player	Technology	Focus & scale	Presence	Whitespace EPBL exploits
Daiki Axis India	Johkasou FRP capsule, 1-50 KLD	Villas, hotels, institutions	Pan-India dealers; ₹200 cr Tumakuru (KA) plant announced	Dealer-led premium import; thin local turnkey-civil + AMC depth
Ion Exchange	INDION packaged, SBR, MBR	SME to municipal, all scales	Pan-India partner network	Small jobs routed to partners, little direct engineering attention
Thermax	FabX MBBR, BioCask packaged, custom ETP	Industrial & large commercial; >1 MLD sweet spot	Pan-India	10-50 KLD packaged sold via 3rd-party distributors, not a focus
Banka BioLoo	DRDO-inoculum bio-toilets, STP, FSM	Railways, institutions (₹56.5 cr rev.)	Pan-India, Hyderabad base	Rail-centric; weak west-coast hospitality presence
SUSBIO (Pune)	ECOTREAT anaerobic + MBBR FRP, 1-500 KLD	Hotels, resorts; from ₹35k/KLD, 3-5 day install	Maharashtra & west	Sharpest rival: match its speed; beat it on Goa/KA service + certification
Netsol / Kelvin (NCR)	MBBR / MBR / SBR fabrication	Commercial & industrial	Pan-India claims; no verified GA/MH/KA installs	Remote AMC response; local 24-48h service wins
CDD Society / Boson	DEWATS nature-based; STP-water polishing + IoT (WaaS)	Communities; Bengaluru apartments	Karnataka base	Adjacent models to learn from (reuse, WaaS), not plant rivals in Tier 2/3

POSITIONING EPBL, the west-coast compliance partner: in-state FRP manufacturing, DRDO-certified ToT, MBBR/SBR/MBR + ozone range, 24-48h corridor service; sold on audited compliance and lifecycle cost, not lowest capex.

Corridor by corridor, gated by service quality and cash: ₹11.7 cr → ₹25.4 cr by FY29

GATE 1 → 2 ≥10 lab-verified reference installs · AMC attach ≥50% · DSO ≤75 days · pipeline ≥3x next-year target

GATE 2 → 3 Channel-sourced ≥40% of qualified pipeline · install cycle ≤45 days · fleet uptime ≥95% · repeat/referral ≥20% of orders · gross margin ≥30%

Acquisition funnel & capacity (FY27 → FY29)

Cycle: hotels 2-4 mo · hospitals 3-6 mo · developers 6-9 mo. Capacity: 2 own crews FY27 → 3 own + 2 partner crews FY29 (~8 installs/crew/yr). KPIs: pipeline cover, proposal→win %, DSO, install cycle, AMC attach, uptime, repeat share.

Revenue build, ₹cr (base case)

RULE A new cluster opens only when the previous one passes its gate: service quality and cash discipline scale before geography.

The binding constraints are cash and credibility, not demand: two red-zone risks get standing controls

Likelihood x impact heatmap

R1 Developer receivables (Fin) · **R2** Price war (Comp) · **R3** Commissioning & inoculum variability (Ops) · **R4** Partner conflict (Distr.) · **R5** Expansion outruns service (Ops) · **R6** Norm tightening (Reg.) · **R7** Long cycles stall cash (Fin) · **R8** Marquee-site failure (Reputation). Red dots = red-zone (likelihood + impact ≥ 8).

Mitigation plan for the six material risks

Risk (cat.)	Root cause & impact	Early warning	Preventive control	Contingency	Owner
R1 Developer receivables (Financial)	Milestone slippage, RERA escrow timing; ₹2-3 cr locked, growth stalls	DSO >75; billing-collection gap >2 mo	30-40-25-5 milestone billing with advance; credit check + PDCs; developer cap 25% of book	Stop-work clause; invoice discounting	CFO
R2 Price-led rivalry (Competitive)	SUSBIO from ₹35k/KLD; Daiki KA plant; NCR online bidders; margin erosion	Win rate <25%; avg discount >8%	Lifecycle-cost selling; compliance + AMC bundle; walk-away floor at 28% GM	Value-engineered Lite SKU for price deals	Sales head
R3 Commissioning & inoculum variation (Operational)	Site variability; biology stabilises over 4-8 weeks; norm breach at handover	>2 sites off-norm at day-30 test	Factory acceptance test; inoculum batch QC; 30/60/90-day third-party NABL tests	Rapid-response protocol; ozone-assist retrofit	Technical head
R4 Partner conflict / underperformance (Distribution)	Overlapping territories, poaching; channel stalls	Partner pipeline <30% of plan; duplicate lead claims	≤2 partners per territory; registered-lead lock; installer academy; tiered margins	Territory reassignment; direct coverage	Channel manager
R5 Expansion outruns service (Operational)	Install base grows faster than technicians; SLA breach, churn	Response >48h; uptime <95%	KPI gates before new clusters; hub per ~150 km; 1 technician : 25 AMC sites	Freeze new clusters; contract service partners	COO
R6 Discharge norms tighten (Regulatory, added category)	NGT / CPCB revisions strand installed designs	Draft notifications; consent-renewal queries	Design margin to stricter norms; IISc tertiary pipeline	Paid retrofit-upgrade programme (upside)	MD + Tech

CONTROL Milestone billing, exposure caps and gated expansion keep the plan self-funding; R7 and R8 stay on watch metrics.

Extend the installed base: rescue and run plants first, monitor them second, recycle their water third

Weighted adjacency scores (7 criteria, 100 pts)

Criteria (weights): market demand 20 · synergy & technical feasibility 20 · capital required 15 (inverse) · margin 15 · operational complexity 10 (inverse) · time-to-market 10 · recurring potential 10. Scores 1-5; matrix in backup (p.9).

The chosen three: sequenced, not simultaneous

STP Rescue: retrofit + O&M takeover NOW (M0-3) · BUILD IN-HOUSE

Why: CPCB 2021 shows a third of installed capacity idle or off-norm, so demand is certain and capex is zero. Target: hotels & societies with failing third-party STPs. Price: ₹3-15 L retrofit + ₹0.5-3 L/yr O&M. Pilot: 10 audits at Goa hotels. Metric: 25 retrofits + 40 O&M contracts by FY29 at ~35% GM; seeds the AMC fleet.

SmartSTP: IoT monitoring & compliance reports M6 · WHITE-LABEL + OWN DASHBOARD

Why: consent renewals increasingly demand data; differentiates every EPBL AMC. Mode: distribute white-label sensors, own the dashboard. Invest ₹50-70 L. Price: ₹10-15k install + ₹3-5k/month per site. Pilot: 20 AMC sites in Goa. Metric: 150 connected sites by FY29, churn <10%.

AquaLoop: treated-water reuse module M9-12 · DEVELOP WITH IISc

Why: hotels pay tanker rates for water CGWA already tells them to recycle; builds directly on the ozone oxy-STP line and Feb-2026 IISc MoU (non-biological treatment). Mode: develop + assemble at Bicholim; ₹1-1.5 cr. Price: ₹6-18 L add-on skid (UF + carbon + UV/O3). Pilot: 2 Goa resorts + 1 Kolhapur society. Metric: attached to 25% of new STP orders by FY29.

Deferred: WaaS/BOOT piloted only in FY29 via partner financing (capital-heavy); MBR premium line, FSTP and biogas dropped for now: capex, municipal dependence, or sub-scale economics. Combined contribution of the three: ~₹2.4 cr/yr recurring by FY29 at 35-40% GM, cross-sold to the installed base.

SEQUENCE Each adjacency deepens the same installed base and lifts recurring revenue to ~10% of sales by FY29; none needs new manufacturing beyond Bicholim.

METHODOLOGY

Sizing: bottom-up per segment per state: units x %lacking x fit x conversion x ticket. No top-down market-report allocation.

Scenarios: conversion, trigger-share and win-rate flexed; conservative = lowest defensible, upside = still capacity-bound.

Scoring: segmentation 10 factors / portfolio 7 criteria, weights shown on slides 3 and 7; scores 1-5, evidence-based.

Rounding: ₹cr to 1 decimal; estimates labelled; no false precision.

Glossary, assumptions and calculation backup

Glossary

STP / ETP	Sewage / Effluent Treatment Plant
KLD / MLD	Kilo / Million Litres per Day
MBBR	Moving Bed Biofilm Reactor
SBR	Sequencing Batch Reactor
MBR	Membrane Bioreactor
DEWATS	Decentralised Wastewater Treatment Systems (nature-based)
FRP	Fibre-Reinforced Plastic
O&M / AMC	Operation & Maintenance / Annual Maintenance Contract
TAM/SAM/SOM	Total / Serviceable Addressable / Obtainable Market
DSO	Days Sales Outstanding (receivable days)
ToT	Transfer of Technology (DRDO licence)
EC / OC	Environmental Clearance / Occupancy Certificate
CTE / CTO	Consent to Establish / Operate (pollution boards)
BMW Rules	Bio-medical Waste Management Rules, 2016
CGWA	Central Ground Water Authority
WaaS / BOOT	Water-as-a-Service / Build-Own-Operate-Transfer
